**SECTION 4. FIRST AID MEASURES****Inhalation:**

In the event of exposure to vapors, immediately remove from the area to a fresh air environment. Individuals showing evidence of inhalation exposure should be taken to an uncontaminated area. Obtain medical advice immediately.

**Skin contact:**

Remove contaminated clothes. Wash skin with large volumes of water. If irritation persists, or any sign of tissue damage is apparent, obtain medical advice immediately.

**Eye contact:**

In the event of contact with the eyes, irrigate with water for at least 15 minutes; obtain medical advice if irritation persists, or any sign of tissue damage is apparent, obtain medical advice immediately.

**Ingestion:**

In the event of accidental ingestion, rinse mouth with water. Give up to one tumbler (half pint) of milk or water. Obtain medical advice immediately. Do not induce vomiting, obtain medical advice immediately.

**Most important symptoms:**

No additional information available. Refer to Section 2 'Response'

**Indication of immediate medical attention:**

None known

**General information:**

As in all cases of potential poisoning, obtain medical advice immediately.

**SECTION 5. FIREFIGHTING MEASURES****Suitable extinguishing media:**

Foam, carbon dioxide, or dry chemical.

**Unsuitable extinguishing media:**

Avoid use of water in extinguishing fires.

**Specific hazards:**

During fire, gases hazardous to health may be formed. Do not allow run-off from fire fighting to enter drains or water courses.

**Special fire fighting procedures:**

Wear self-contained breathing apparatus for firefighting. Move containers from fire area if it can be done safely. Use water spray jet to protect personnel and to cool endangered containers.

**SECTION 6. ACCIDENTAL RELEASE MEASURES****Personal precautions, protective equipment and emergency procedures:**

Evacuate personnel to safe areas. Remove all sources of ignition. Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up.

**Environmental precautions:**

Do not allow to enter into soil/subsoil. Do not allow to enter into surface water or drains. Dispose of in accordance with

local regulations. Local authorities should be advised if significant spillage cannot be contained.

**Methods and materials for containment and cleaning up:**

Soak up with inert absorbent material (e.g. sand, silica gel, vermiculite). Keep in suitable and closed containers for disposal. Clean contaminated floors and objects thoroughly while observing environmental regulations.

**SECTION 7. HANDLING AND STORAGE****Precautions for safe handling:**

Avoid contact with skin and eyes. Avoid prolonged inhalation of vapors. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Handle in accordance with good industrial hygiene and safety practices.

**Conditions for safe storage, including any incompatibilities:**

Store in tightly closed and upright container in a cool, dry, ventilated area. Store away from light, heat, and sources of ignition.

**SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION****Exposure Guidelines:**

ACGIH: dl-Citronellol (CAS 106-22-9) TWA 5 ppm

ACGIH: Geraniol (CAS 106-24-1) TWA 5 ppm

ACGIH: beta-Pinene (CAS 127-91-3) TWA 20 ppm

ACGIH: Citral (CAS 5392-40-5) TWA 5 ppm

ACGIH: d-Limonene (CAS 5989-27-5) TWA 5 ppm

ACGIH: alpha-Pinene (CAS 80-56-8) TWA 20 ppm

**Appropriate Engineering Controls:****Ventilation:**

Use engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, use only with adequate ventilation. Local exhaust ventilation may be necessary for some operations.

**Personal Protective Equipment:****Eye protection:**

Ensure that eyewash stations and safety showers are close to the workstation location. Chemical resistant goggles must be worn.

**Hand protection:**

Wear chemical resistant gloves suitable for this material as determined by a hazard assessment. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

**Skin and body protection:**

Wear protective clothing suitable for this material as determined by a hazard assessment.

**Respiratory protection:**

Respiratory protection should be worn when workplace exposures exceed exposure limit requirements or guidelines. If there are no applicable exposure limits or guidelines, use an approved respirator where there is a potential for adverse effects, including but not limited to respiratory irritation or odor, where indicated or required by the exposure

assessment. Selection of air-purifying or positive-pressure supplied air will depend on the results of the exposure assessment which includes an evaluation of the specific operations and the actual or potential airborne concentrations. The type of cartridge or filter to be used must be selected and approved for the chemical, class, or classes of chemicals likely to be encountered in the workplace. For emergency conditions, use an approved positive-pressure self-contained breathing apparatus.

**General hygiene considerations:**

Handle in accordance with good industrial hygiene and safety practice. Remove contaminated clothing and protective equipment before entering eating areas. Wash hands before breaks and immediately after handling the product.
